

How to get from Denver International Airport to MH Lighting and Controls.

Because of the distance between our office and Denver's new airport, D.I.A., it has become very inefficient for our people to drive there and pick up incoming guests. Therefore, we ask that you select alternate transportation between D.I.A. and downtown Denver. Please allow 1 hour for the trip to your hotel.

Taxis:

Cab fare is about \$50.00 one way plus tip. The cab companies are offering ride sharing where 2 people would split the fare if possible. Just proceed to the cab area outside level 5 baggage claim area.

Vans:

Several companies offer vans to the downtown Denver Hotels. These will cost \$18.00 one way or \$32.00 round trip. If you purchase a round trip, you can arrange for a return pick-up. Just get a ticket at Ground Transportation near the baggage area on level 5. Vans depart every few minutes. Most of the hotels listed below recommend "The Super Shuttle."
Please call us when you get to your hotel and we will pick you up. Thank you for your consideration and understanding.

Hotels
